

### Purpose of Community of Practice

The NQOCN POCQI India Community of Practice (COP) is constituted to bring together the individuals with diversity of knowledge experiences, and resources in the domain of Point of Care Quality Improvement (POCQI). Its members would challenge the status quo, push boundaries, learn from others, launch healthy vibrant initiatives, share best practices and learnings, on a local, regional, and global scale.

The NQOCN POCQI India Community of Practice will represent a friendly platform for sharing the recent evidence-based information, thoughts, innovative ideas and experiences of likeminded passionate members who are working towards improving the quality of healthcare. This will help in capacity building of the community members and serve as a source of constant encouragement. The knowledge gained through participation in the wide range of COP activities will be helpful in generating innovative and meaningful ideas. Additionally, it will also provide a platform to troubleshoot and mentor ongoing improvement projects, share successful improvement ideas and document new practical learnings of improvement science.

The COP will create a pool of experts in the field of quality improvement (QI) across India, who could serve as catalyst for similar improvement at national and international levels. This in turn will have the potential to favourably impact the outcomes of care across various health care settings in other low- and middle-income countries (LMICs).

### Mission

To create a national interdisciplinary platform for facilitating interactive learning between various individuals, facilities, stakeholders and government agencies to improve quality of healthcare. NQOCN POCQI community of practice will be guided by the working principle- **“All Teach and All Learn”**.

### Goals

The goals of the POCQI Community of Practice are as follows:

1. To work together towards shared objective of quality improvement in health care system that is safe, effective, patient-centred, efficient, timely, and equitable.
2. To connect state, national and international experts of QI on a common platform.
3. To create a repository of research documents, guidelines and innovations particularly in POCQI/QI.
4. To develop a culture of QI and contribute towards health system strengthening across the country.
5. To provide a psychologically safe and positive environment to brainstorm, develop and implement innovative QI initiatives to bring about meaningful change.
6. To identify and nurture talented and promising QI practitioners.
7. To begin a Quarterly Journal for publishing successful QI projects and QI learnings from members.

### Membership Benefits

- Opportunity to show case the achievements and good work.
- Networking opportunities at individual level.
- Creates a professional identity and reputation.
- Platform to develop professionally and continue learning about improving quality of care.
